

GeoServices, Ltd.

It's All About Water™

Storage Tank Services

For more than 20 years, GeoServices has provided a full range of storage tank services from the removal and installation of storage tank systems, to the environmental characterization and closure of leaking underground storage tanks (LUST). GeoServices routinely works through the PADEP regulations to properly close storage tank systems. Our experienced staff of professionals has completed hundreds of underground and above ground storage tank projects including home owner storage tanks, gas stations, industrial facilities, and bulk storage facilities.

GEOSERVICES is a full service environmental consulting firm experienced in working through the storage tank regulations (Chapter 245 of the Pennsylvania code) and USTIF claims. GeoServices routinely investigates suspected or confirmed releases from storage tank systems. We offer the following services commonly required to investigate and mitigate releases from storage tank systems:

- Site Characterization
- Soil and Ground Water Remediation
- Vapor Intrusion Evaluations
- Contaminant Fate and Transport Analysis
- USTIF Funding Assistance
- Risk Assessment and Pathway Elimination

Whether the issue is a leaking storage tank system, removal or replacement of storage tanks, or characterization and remediation of a release, GeoServices has professionals on staff with the necessary expertise and experience to resolve your storage tank problems.

GEOSERVICES' professional staff looks forward to a detailed discussion of your needs. Please call, e-mail, or contact us through our website, www.GeoServicesLtd.com.
